WORK EXPERIENCE

Full Stack Developer Intern - Medixcy

May 2025 – Nov 2025

Developed cross-platform mobile application using Flutter integrated with Firebase for authentication, real-time data handling, and backend services; enhanced user experience with responsive UI design and implemented AI-driven features such as text summarization and chatbot functionality using Google Gemini API.

PROJECTS

Socratic AI – GitHub (Next.js, Flutter, Express, MongoDB, FastAPI)

Built a cross-platform AI tutoring system to address the limitation of traditional learning tools that provide direct answers without improving understanding; implemented a Socratic method-based interaction using Next.js and Flutter with an Express and MongoDB backend, and integrated a Python FastAPI service for context-aware guidance, session continuity, and personalized learning.

Alumni Connect – GitHub (Flutter, Firebase)

Developed a cross-platform mobile application to address the lack of structured communication between students and alumni for mentorship and job referrals. built using Flutter with Firebase (Firestore, Auth, Storage) for real-time messaging, role-based dashboards, and scalable backend services, following clean architecture with Bloc/Cubit for maintainable and high-performance design.
